

Faculty Disclosures and Resolution of Conflict of Interest

Disclosure Policy

Baptist Health has a process in place to ensure balance, independence, objectivity and scientific rigor in CME programming. Through this process Baptist Health identifies and, when applicable, resolves conflicts of interest of all individuals in a position to control or influence CME content, including faculty, conference directors, planners, content reviewers, CME Committee members and the CME Department staff. The CME Department is responsible for content review and, when necessary, makes modifications to resolve conflicts of interest so final presentations are fair and unbiased. These efforts are intended to affirm that the educational content is not controlled or influenced – directly or indirectly – by a commercial interest. As defined by ACCME, a commercial interest is any entity producing, marketing, re-selling, or distributing healthcare goods or services consumed by, or used on, patients. The ACCME does not consider providers of clinical service directly to patients to be commercial interests.

Individuals participating in this CME activity are responsible for identifying references to off-label or unapproved product usage in their discussions and recommendations.

Non-faculty Contributors and others involved in the planning, development, and editing/review of the content have no relevant financial relationships to disclose.

Copyright

Baptist Health is **not** responsible for any image/illustration content prepared by faculty members for their presentations.

Disclosures for individuals in a position to control or influence content are provided below:
